

Market Release Note

MRN_TS1054SS

Product number: TS1054SS

Product description: Tecom 4G Communication Module – UltraSync ready with SIM

Release date: 4 August 2021

Aritech is pleased to announce the availability of a single-SIM option in the Tecom 4G Communication Module family.

The 4G Communication Module is an expansion module which allows Challenger panels to communicate over 4G wireless networks. These new models utilise the existing hardware of the existing Communication Module (TS1054), and now come pre-loaded with SIM cards to provide an easier solution for customers wanting to use 4G connectivity over UltraSync.

Compatibility

- TS1054SS is a single-SIM version (available for New Zealand only)
- Supported on Challenger10 V10-06.19251 or higher
- Supported on ChallengerPlus all versions
- Supported on ChallengerLEPlus all versions

Documentation and Downloads

Marketing Collateral	4G Communication Module datasheet
	Tecom Hardware Compatibility Matrix
Technical Manuals	Tecom 4G Communication Module Installation Sheet

The latest version of firmware is available within CTPlus. All downloads can be found at www.firesecurityproducts.com.au/downloads-and-resources-library.

Known issues

- Communications may not succeed if signal is weak. Ensure correct placement of antenna prior to installation.
