MRN_TVFC-M0X-0X0X

Product number:	TVFC-M01-0401-BUL-G; TVFC-M01-0403-BUL-G; TVFC-M01-0402-DOM-G; TVFC-M01-0403-DOM-G; TVFC-M01-0402-TUR-G; TVFC-M01-0802-TUR-G; TVFC-M01-0401-WED-G
Product description:	TruVision Full Colour IP Cameras
Release date:	23rd August 2023

Aritech are pleased to announce the launch of the new TruVision Full Colour IP cameras.

Experience a visibility that surpasses traditional IP cameras with TruVision Full Colour IP cameras. The cameras can produce full colour video day and night, allowing for clearer and more accurate identification of people and objects in the field of view.

The built-in supplemental white light ensures that even in complete darkness, the cameras can generate clear and usable footage.

The full colour camera range is reliable and advanced providing high quality, full colour video footage to identify and detect potential threats or incidents even in remote, nocturnal environments.

Full Colour Cameras: User Benefits

Maximum Image Details 24/7

- Advanced sensor with large aperture for vivid colour images, even when there is no light, detects people, vehicles, animals, and other objects even in the middle of the night in isolated places.
- In complete darkness the built-in white light can be used to make sure no details are missed.

A Multitude of Applications

- Upgrade your video system and replace your traditional day/night cameras to have full colour video footage 24/7.
- Use the colours to identify your intruder: a blue jacket? A black car? It can now be revealed in the dark.
- The cameras also provide the possibility to deter intruders with the built-in alarm strobe light and speaker; scare them away by letting them know you are watching.

Smart Features

- Person/vehicle classification makes it easier to detect what is needed and trigger the right notification.

Features

- 4MP and 8MP resolution
- Bullet, Dome, Turret, Wedge models
- White Light as "free" floodlight
- Up to 60m built-in white light
