

Connect and manage your security solution from anywhere, at any time with the new **TecomPlus** app

The TecomPlus mobile app gives you the flexibility you need to access and control your security solution from anywhere in the world.

With more control than ever before, the TecomPlus mobile app gives you the flexibility to manage the suite of 'Plus' solutions in the Tecom portfolio. From anywhere in the world, at any time you can be notified to alarms, power and system failures and more.

With a secure, encrypted cloud connection via UltraSync, this modern interface allows you to open doors, arm/disarm areas, isolate inputs or control lighting at the touch of a button. Setup is a breeze, with an improved connection between your security panel and mobile device thanks to UltraSync.

Monitor the activity on your site from anywhere in the world with TruVision CCTV integration. With an easy setup via CTPlus, you can view live footage, replay existing footage and much more from any location.

Manage user access through the programming of user PIN codes or access control cards. TecomPlus also allows you to edit user details including access groups and expiry dates.

TecomPlus is just another reason why Tecom continues to meet the needs of your busy lifestyle, while delivering a more secure future for your premises.

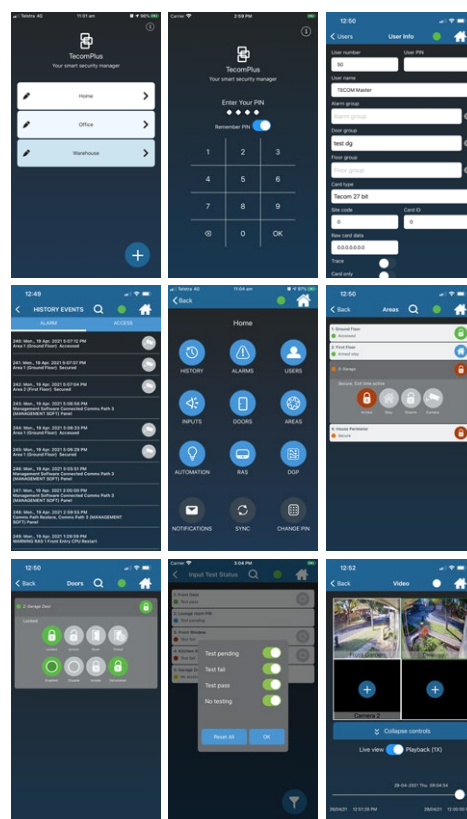

TecomPlus mobile app
