Introducing M series IP cameras

Why choose the M series ?

For customers demanding precision of video events at competitive prices, the TruVision® M series IP cameras is the right choice.

With embedded smart object classification, the cameras can filter out false alarms. The available colour, lens and form factor options make the M series IP cameras suitable for a wide variety of small and larger applications.

* The M series is the successor of the S6 IP cameras.

There are three main reasons to choose the TruVision M series :

- Efficiency : people/vehicle classification significantly reduces the number of reported alarms/events versus traditional cameras, and limits false alarms
- Adaptability : seven form factors, three colour options, varifocal and fixed lenses... a total line-up of 33 cameras to satisfy a bigger variety of businesses
- Ease of use : quick install & adjustments possible with the motorised lens, and plugin free browser support

Features

- Person/vehicle classification
- Up to 8MP/4K resolution
- Fixed and motorised lens options
- Built-in IR on all models
- Variety of form factors
- Plugin-free browser support
- IP67/IK10 on selected models
- Additional white variants and accessories

EFFICIENT

Optimisation on different levels

- **Target classification** significantly reduces the number of reported alarms/events
- **False alarm immunity**
- Less events, less storage
- Only relevant video alarms/events/storage
- Easy and quick video search for end users (finding relevant video footages)

ADAPTABLE

More options, more flexibility

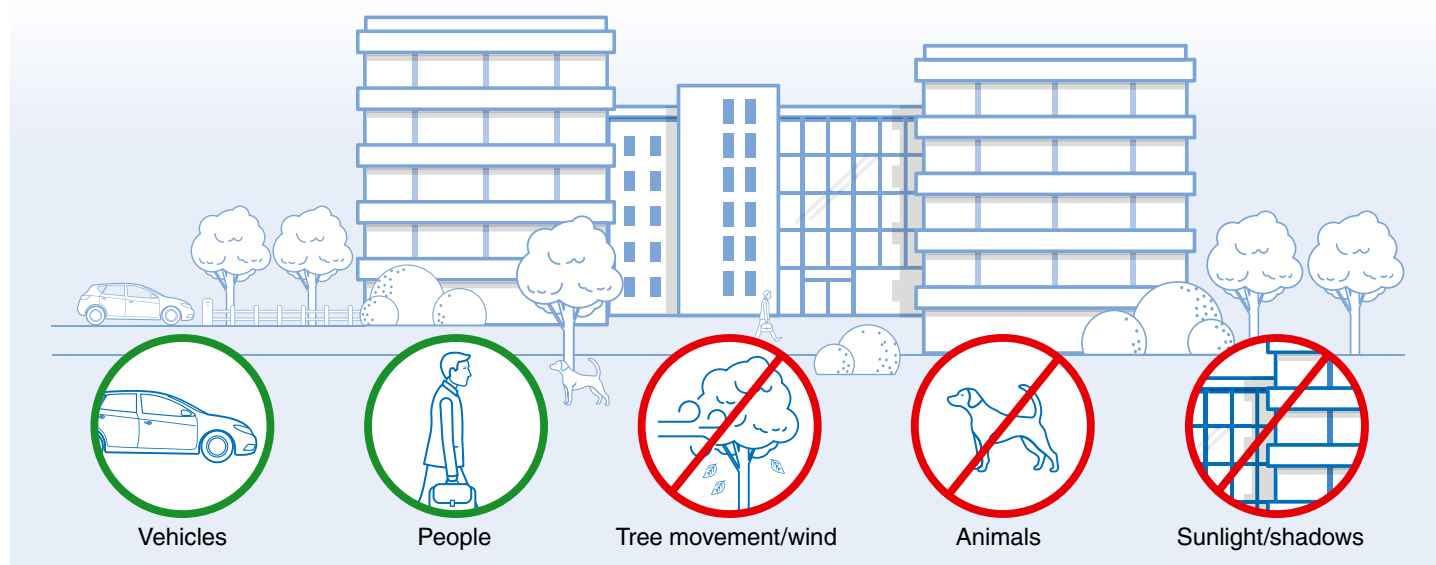

- Up to 7 different **form factors**
- Multiple **color options**
- New **white accessories**

EASY TO USE

Easy to install

- Quick adjustment with **the motorised zoom/autofocus lens**
- Plugin-free browser support

Smart object classification

Who is it for ?

Applications

The TruVision M series is the mid-range level of the camera portfolio and ideal for small to medium businesses, and even high residential.

Competitive in pricing, TruVision M series cameras offer an ample set of features that go beyond the basic cameras seen on the market.

Flexible options for different environments

Small installations

- Fixed lens models
- Standard IR range
- Small form factors

Large installations

- Varifocal lens models
- Extended IR coverage
- Small and large models

Integration

Another major reason to choose the TruVision M series

The TruVision M series IP cameras can be fully integrated to the TruVision ecosystem. The recorder, TruVision Navigator and IFS® network products completes the full video surveillance network and can all be linked in the UltraSync™ cloud.

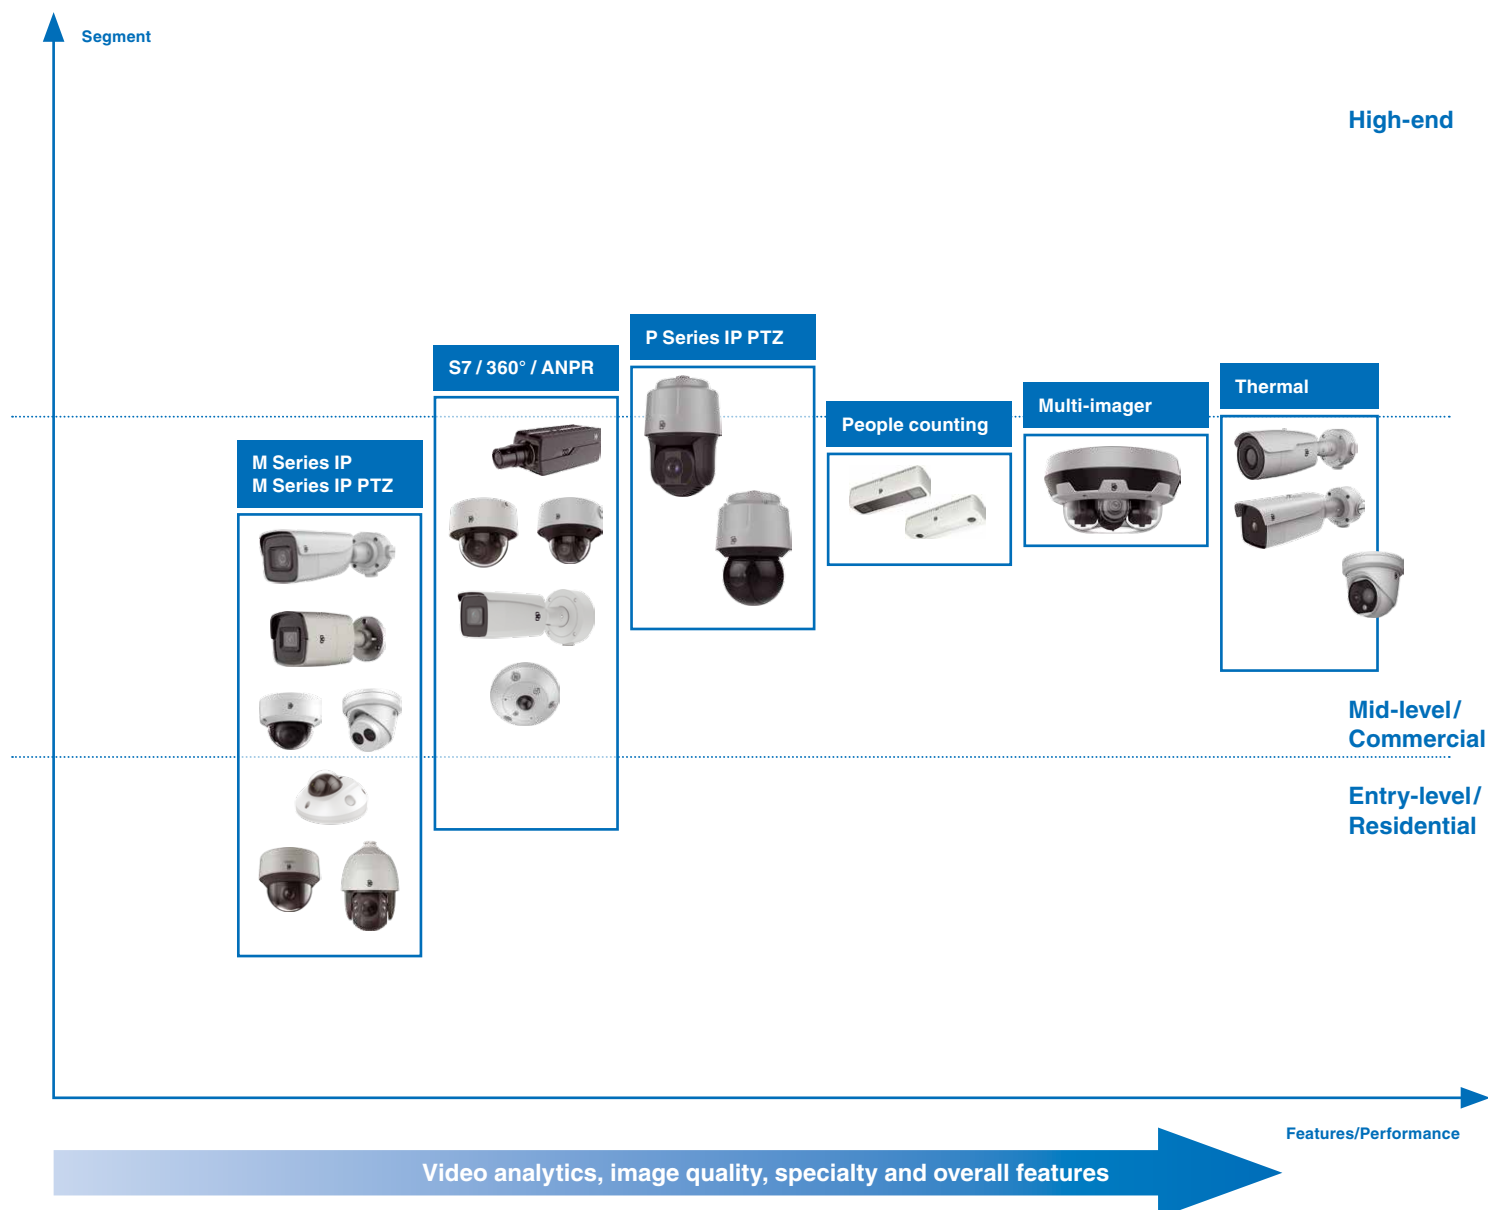

Supported hardware & software

- **Recorders:** supported by TruVision recorders*
- **TruVision Navigator video management software and TVRMobile app:** supported in TVRMobile app and from TruVision Navigator 9.1 service pack 1 (SP1) onwards
- **ONVIF®:** listed in the conformant products list on the ONVIF website
- **LenelS2 OnGuard® access control system:** supported in LenelS2 NVR (LNVR) 7.7 Camera Pack 4.0
- **Milestone:** validated with Milestone XProtect® video management system
- **Plugin-free web browsers:** in addition to Microsoft® Internet Explorer®, the recorders can also be accessed and configured with browsers such as Google Chrome™, Firefox® and with Apple Safari® that don't support ActiveX plugins

* Supported features may vary depending on recorder features and capabilities.

Portfolio positioning

How does M series fit into the TruVision camera portfolio ?

Cameras in the TruVision M series
