

WMS Pro

Web Management System

Trade Overview

WHO IS IT FOR?

Existing Tecom sites currently using:

- Titan
- CTPlus
- Security Commander
- Forcefield
- Hardware without management software

New Customers:

- All single or multi-site customers who require comprehensive, easy to use management software with minimal setup and ongoing maintenance required.
- Minimal licensing, license your controller and all doors, inputs, outputs and users are included.

- Designed and developed in Australia for local market requirements. Local tech support and local administration mean licensing your product and accessing support are easier than ever.
- No client tools to install, management is 100% web based!
- Great device support, ChallengerPlus, ChallengerLEPlus, Discovery and Network Access Controller are all supported.
- Easy migration and initial setup! Simply setup the communications path from the device to the WMS Pro server, and WMS Pro will automatically discover the device, upload its programming, and optimise it ready for use!

HIGHLIGHTS

- Site maps allow an Operator to view a fully customisable layout of their site and devices, with each device indicating its live status, and providing quick access to control commands and active alarms.
- Automations allow the user to create actions (e.g. open a door, disarm an area), and start them based on events or time. Save favourites or create action lists for enhanced site management with minimal effort!
- Asset tracking for devices is included in WMS Pro and is configurable to provide alerts when system components are reaching the end of their service life.

- Developed exclusively for Tecom, all parts of the WMS Pro system are designed to interact with Tecom hardware in the best way possible. Server resources are also kept to a minimum, with the communication and database engines optimised for maximum efficiency.
- Comprehensive overview of Tecom devices means no guess work or requirement to interrogate from other systems.
- With the help file contained in the web client, and configuration wizards available for complex programming, WMS Pro requires less training for installers and end users.

FAQ'S

- Q. How do I access WMS Pro?**
A. WMS Pro is downloadable from the [Aritech website](#) and comes with a free 60-day trial. Licensing for 5 controllers (panels), 5 operators, Alarm Management module and the Cardholder API are included. Try the software risk free!
- Q. Where is WMS Pro made?**
A. WMS Pro is designed and made in Melbourne **specifically for the Australian and New Zealand security market.**
- Q. What if the site needs more simple, cost effective management software?**
A. WMS Pro comes in different variations. Start small with WMS Pro Lite, and easily upgrade if needs change, no re-installation required.

WMS PRO

LITE vs STANDARD EDITION

WMS Pro is available in two base editions - **Lite** and **Standard**.

- **Lite** edition is ideal for small customers who may not require alarm management and just want a modern and easy to use management software for their Tecom system
- **Standard** edition is ideal for customers managing large and/or multi-site systems, with the potential for future integrations to manage cardholders and/or devices using third party systems

	Lite Edition	Standard Edition
