Tecom Management Software

WMS Pro

Web Management System

Lite

WHY CHOOSE WMS PRO

WMS Pro is the next step in management software, providing a seamless and modern management solution for your security and access control system.

Designed and developed in Australia, for Australian and global markets.

WMS Pro is the latest software suite from Aritech that works hand-in-hand with your Tecom security and access control systems.

WMS Pro has been designed to improve safety and increase efficiency, while adding value to any installation, for small, medium and large enterprises.

FEATURES FOR WMS PRO LITE

- Widget Based Dashboard • Cardholder and Credential Management
- Flexible Access Rights • Device & Software History Logs
- Wizards & Tools • Control Connected Devices
- CTPlus integration • Tecom Smart Card Programmer Integration
- Server installation software • Multi-client • Cyber Secure

UPCOMING FEATURES FOR WMS PRO

- Discovery integration • NAC integration • CTPlus Diagnostics integration • Increased capacity • History archive/export • New access groups • Alarm handling • Public documented API • Trigger logic (event/time) • All reports from WMS and Forcefield • IP Receiver • Bulk firmware update • Automated reporting • Graphic maps • Server load balancing • Native web-based diagnostics • Multiple/alternate profiles
- Site lockout • Event macros (enhanced trigger logic) • Intercom integration • Watch-house • Native hardware configuration • Card printing • Guard tour • Duress paging • Wizards • Custom card formats
- Mobile credentials • WMS features plus API • Predictive data analytics

A SOLUTION FOR EVERY INDUSTRY

Government

Government facilities require the ability to authenticate user access to restricted areas. When a user access event occurs, WMS Pro can display the event details and the user photo ID for verification against video footage.

Education

Whether a small school or large university, people management and protection of secure areas are key requirements. WMS Pro can provide almost unlimited control of users door access, floor access and alarm access, and because WMS Pro can manage up to one million users, there is always capacity to grow!

Multi-Site Commercial

WMS Pro is particularly suited to multi-site and multi-operator deployments. WMS Pro can link all the locations together over secure and low bandwidth local area network (LAN) or wide area network (WAN) for centralised or distributed management of the security system.

Financial Institutions

Financial institutions throughout ANZ have trusted Tecom Challenger since 1990. WMS Pro can enhance the security that Challenger provides with features such as Automated Guard Tours, CCTV Integration and Remote Alarm Monitoring.

Industrial/Mines

Industrial and mining facilities not only require protection of assets but also the safety of people. WMS Pro may be integrated with OH&S policies, providing critical information on the location of personnel such as on-site reports and muster reporting, vital in case of an emergency.

Utilities

Critical infrastructures such as electricity, water and waste, by their nature, are often located across large and remote areas. WMS Pro can provide real-time remote alarm monitoring and management of these sites while providing unmatched flexibility and low bandwidth network connections to each facility.

Designed and built in Australia, for Australians

CARD MANAGEMENT

Full management of card holders and their access rights across multiple systems. Assigning a range of credentials, access rights and time schedules to individual card holders.

BENEFITS

Card management in WMS Pro provides users with the ability to easily create and revoke credentials as customers and employees come and go, change roles, or as business processes and policies evolve.

CONTROL CONNECTED DEVICES

Easily control and view system devices and manage information directly from the WMS Pro web interface to ensure you are kept up-to-date on the status of your site.

BENEFITS

The Status and Control feature of WMS Pro saves time and resources by allowing the user to complete tasks on individual devices across the system immediately and provide remote management of each system.

BENEFITS

The widget-based dashboard on WMS Pro allows the user to filter information that is relevant to their requirements and provides a quick and easy overview of the health of the system.

WIDGET BASED DASHBOARD

The widget based dashboard allows for a configurable view of connected systems via tiles or icons that provide up-to-date information.

BENEFITS

Meeting Australian cyber security standards that protect your IT systems from potential threats, giving you the ultimate peace of mind that your system and data is protected! This crucial benefit empowers users to leverage the very latest computer hardware and virtual environments.

CYBER SECURE

Complies with all the latest IT Industry best practices and cyber security requirements. Pen-testing and analysis performed using industry experts and tools that meet security standards ISO 26262, ISO/IEC TS 17961, OWASP Top 10, CWE Top 25, and more.

About Aritech

Aritech provides leading security and life-safety solutions for both commercial and residential applications covering intrusion, video, transmission and access. Offering some of the most-trusted product names in the industry, and backed by ongoing partner services and support, Aritech helps customers secure and protect what matters most.
